```java
1   // Online Java Compiler
2   // Use this editor to write, compile
        and run your Java code online
3   import java.util.Scanner;
4   class Substring_replace{
5       public static void main(String[]
            args) {
6           Scanner scan = new Scanner
                (System.in);
7           System.out.println("Enter a
                String");
8           String string = scan.next() ;
9           System.out.println("Enter a
                Substring");
10          String Substring = scan.next();
11
12          System.out.println("Enter the
                new String");
13          String newstring = scan.next();
14
15          String modifiedstring = string.
                replace(Substring,
                newstring);
16
17          System.out.println
                (modifiedstring);
18      }
19  }
```
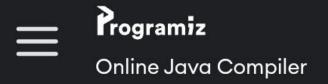

Run

```
java -cp /tmp/owFilJ5EOH Substring_replace
Enter a String
talentbattle
Enter a Substring
talent
Enter the new String
student
studentbattle
```
